About Aurora

Founded in 1997, Aurora Consulting is a leading edge IT company specialising in Databases, E-Business Solutions, Data Warehousing and Business Intelligence. Technically, Aurora is highly skilled in Oracle, Java, SQL Server, .Net, Cognos and Open technology. Our company enjoys a superb track record in providing exceptional levels of customer satisfaction and excellent value for money. By combining extensive business experience and technical expertise, Aurora is uniquely positioned to assist our customers with their information technology needs.

Our Experience

In the fields of Databases, E-Business Solutions, Data Warehousing and Business Intelligence application development, Aurora delivered a large number of successful projects and top-quality applications. Many Aurora Consultants have previously worked for large and reputable IT consulting companies, and have extensive experience with a wide range of Oracle, Java, SQL Server, Ingres, Cognos and other tools. In their many years of experience, our consultants have developed countless business solutions that are exemplary in their respective industries. Aurora enjoys a superb track record, and draws on this invaluable knowledge to enable the best practices and time-proven solutions to be part of our customers' implementation. In addition to our core business activities, Aurora Consultants frequently present at international and regional events such as Oracle Open World and User Group Conferences.

Customer Testimonies

"Aurora's unique combination of business and technical expertise in the area of Data Warehousing has played a pivotal role in the success of our Data Warehousing initiatives. In strategic partnership with Aurora, the Department's Corporate Data Warehouse has evolved into a highly advanced Business Intelligence environment."

Steve Rakich
Manager, Information Management & Systems
Department of Education & Training

"Through its well-defined project processes and stringent quality standards, Aurora has demonstrated its competency in managing and delivering a large IT project. Aurora's in-depth technical expertise has also been a significant contributing factor in developing the Agrifood Infonet Portal into a state-of-the-art web-based application."

Andrea Berteit
Former Trade & Food Development Project Manager
Department of Agriculture & Food

"Always competent and professional, Aurora Consultants have provided us an exceptional level of service. Never losing sight of our budget and functional needs, Aurora's pragmatic approach has assured Rio Tinto Exploration excellent value-for-money."

Simon Warburton
Stream leader - Information Systems and Technology
Rio Tinto Ltd

"Aurora's innovative solutions to complex technical and business problems have greatly improved our productivity and competitive advantage. With Aurora's help, APA has become a market leader in providing Internet based financial services to our clients."

Michael Percsy
Former Development Manager
APA Financial Services Ltd

"Aurora's competency and responsiveness provided us utmost value in the development and enhancement to our Data Mart environment. With Aurora's help, our Data Marts are evolving into strategic decision making tools for the entire organisation."

Glen Boog
Business Support Services
Water Corporation
